

A teal-colored line drawing of a whale, shown in profile facing left. The whale has a small dorsal fin on its back and a large, bifurcated tail fluke. A small black dot is visible on the whale's side, representing an eye or a mark. The text is centered within the whale's body.

**Wovon ernähren sich
Wale?**

A teal-colored line drawing of a whale, shown in profile facing left. The whale has a small dorsal fin on its back and a large, bifurcated tail fluke. A small black dot is visible on the whale's side, representing an eye or a mark. The text is centered within the whale's body.

**Wie lange können
Wale tauchen?**

A simple teal line drawing of a whale, shown in profile facing left. It has a small dorsal fin on its back and a large, bifurcated tail fluke. The whale's body is rounded, and there is a small black dot on its side representing an eye.

**Was für Wale gibt es
in der Nordsee?**

A simple teal line drawing of a whale, shown in profile facing left. It has a small dorsal fin on its back and a large, bifurcated tail fluke. The whale's body is rounded, and there is a small black dot on its side representing an eye.

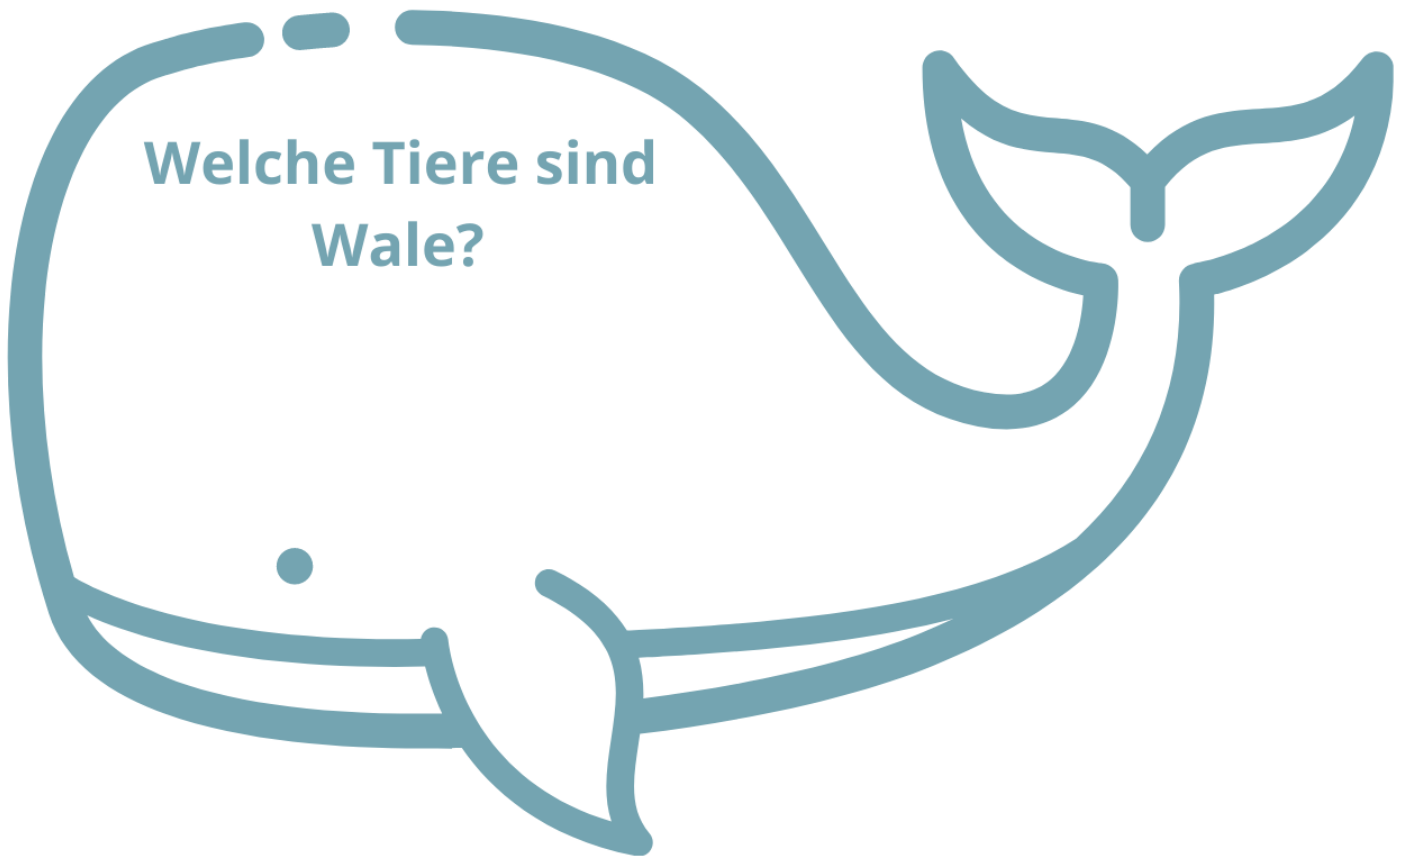

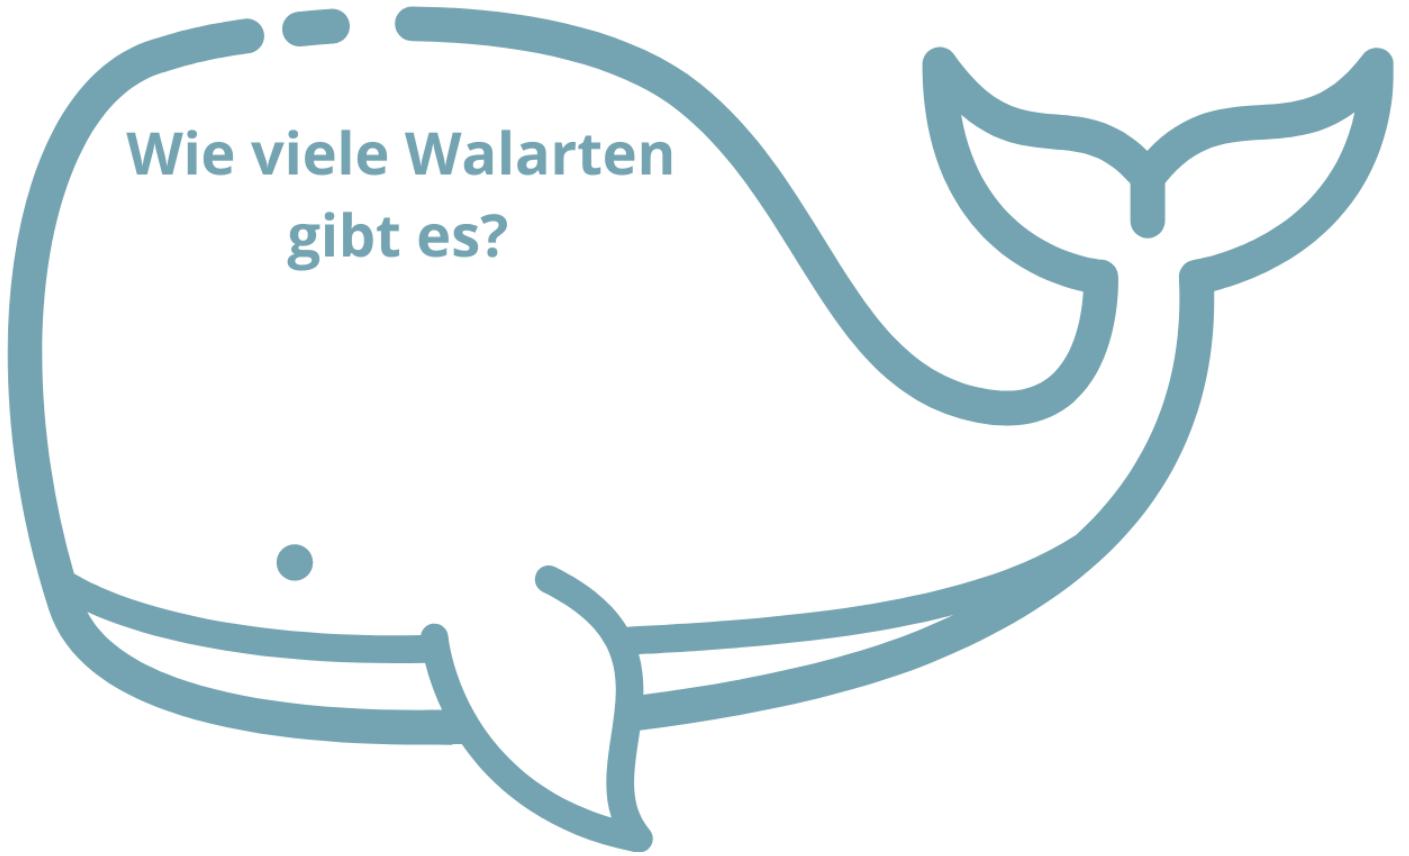

**Wie kommunizieren
Wale?**

A teal-colored line drawing of a whale, shown from a side profile. The whale is facing left. It has a large, rounded head with a small dorsal fin on top. The body tapers towards the tail, which is a large, bifurcated tail fluke. A small black dot is visible on the whale's side, representing an eye or a small fin. The entire drawing is composed of simple, thick teal lines.
